

A Glasgow company will celebrate a milestone tomorrow morning. Farmer's Farmers Rural Electric Cooperative- or Farmer's RECC- will honor its 75th year in operation at the Chamber of Commerce third quarter breakfast.

Director of Public Communications Caralyne Wright says Farmer's RECC provides electricity to local farmers to help make farms more productive and improve the quality of life for members.

Wright says it's a mission they have aimed to fulfill since 1938:
