

GAS PRICES REMAIN STEADY

Wednesday, 23 October 2013 15:27

West Central Kentucky gas prices remain at \$3.35 a gallon this week, according to AAA East Central.

Average price for regular unleaded gasoline is \$3.34 per gallon and is just fractions of a penny below the nearly nine-month low registered one week ago. The last time the national average registered less than \$3.34 per gallon was in January.

Despite the recent pause in the decline, AAA continues to expect that gas prices will fall even further approaching the end of the year. In our listening area, the Bowling Green average is \$3.47 and Elizabethtown's average is at \$3.38.
