

GLASGOW EPB CABLE OUTAGE UPDATE

Sunday, 08 December 2013 10:26

UPDATE: We are working a few small cable outages, mainly due to cable drops breaking and falling. There are no reported power outages yet, BUT, we have our eyes on a few very large pine trees that are leaning toward major power lines. If they go, things will get interesting. Stay in and safe everyone, and remember, don't go anywhere near a downed conductor. Call us at 651-8341 so we can have one of our professionals take a look at them.
