

EXPANSION WILL CREATE 10 NEW JOBS IN CAMPBELLSVILLE

Saturday, 28 December 2013 05:21

Governor Steve Beshear announced that Fluortubing USA LLC, a plastic tubing manufacturer, plans to expand operations in Campbellsville. This expansion will create 10 full-time jobs and a nearly \$800,000 investment.

During the past 7 years, Fluortubing has grown from a distribution warehouse with 2 employees to an operation that supplies hose liners to companies around the world.

Fluortubing manufactures plastic tubing for use in the chemical, food and pharmaceutical industries. The company is expanding its operation to include an extrusion tower and resin mixing rooms so they can manufacture pipe on site. Currently pipe is imported from its parent company in Europe, being able to make the pipe on site will greatly decrease the company's shipping costs.
